Table Exhibit

Dummy plot 1

Dummy plot 2

Dummy Data

Label		Row 1		Row 2	
Label	Dummy method	Col 1		Col 2	
		Q1	Q2	Q1	Q2
China	Row 1	1	2	3	4
	Row 2	5	6	7	8

Something		Col 1	
New	Another test	H1	H2
		1	2
Row 1	Row 2	3	4

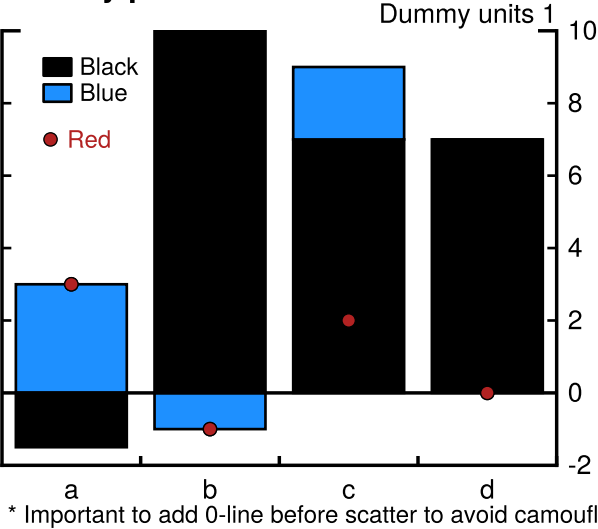

Note: The code for these tables is outdated. It is heavily suggested you construct tables using the `cb.form_partition()` framework (see fifth page).

Faux Color Matrix

	Canada	France	Germany	Italy	Japan	Switzerland	United Kingdom	Brazil	China	Hong Kong	Korea	Mexico	Turkey
Jul 2020	T	C	H	N	M	T	C	H	N	M	T	C	H
Jan 2020	N	M	T	C	H	N	M	T	C	H	N	M	T

Key: These Colors Have No Meaning

The whimsical key is meant to emphasize this dummy table's lack of substance only.  
Note: The code for this table is outdated. It is heavily suggested you construct tables using the `cb.form_partition()` framework (see fifth page).

Final Exhibit

Title

cb.form\_partition() Table

	Ser1	Ser2
2021-01-01	0.535	0.679
2021-01-02	0.278	0.999
2021-01-03	0.333	0.421

Note: This table was constructed using the  
cb.form\_partition() framework (recommended).
